The Instant Link to Your Pharmacy and More

A web-based worksite that gives you convenient access to clinical and financial information, Omniview helps you maximize efficiency and minimize costs.

Omniview gives you instant access to in-depth clinical and financial information. Care staff can make or cancel orders, initiate refills, and view the fulfillment status of each resident's medications so there are no questions about which medications are available and when.

Accounting and management can view bills, resolve discrepancies and make payments in real time. Extensive reporting capabilities make Omniview indispensable for decision makers, who can see and analyze trends through a variety of user friendly reports.

One Online Worksite for Everything

- Ordering
- Order Tracking
- Medicare Part D Claim Resolution
- Pre-Admission Assessment
- Billing
- Payment
- Census
- Consultant Reports
- Physician Prescribing Trends
- Drug & Formulary Information
- And much more

Enhance Medication Management

Omniview enables instant communication of prescription orders, changes and cancellations while conveniently supporting other important medication events such as returns, destruction, leave of absence or discharge.

- Fast **E-refill** orders with immediate on-screen confirmation
- **No faxing** or manual data entry (for routine medications)
- **Track order** processing **and delivery** status
- **Review** status of **rejected Med D claims**

Anytime of night or day, Omniview will provide clear statements about the status of your medication orders.

Omniview's Order Status Responses	
Refill Request Received	The pharmacy is filling this order
Refill too Soon	The order was placed too early. It's being held until it's eligible and will then be refilled
Invalid Rx Number	The pharmacy doesn't recognize the Rx number you've transmitted. You'll need to submit a different number or follow up by phone or no refill will be processed
Canceled	This order was canceled
Pharmacy Follow-Up Required	There's an issue with this order. You must discuss with the pharmacy to resolve the problem before the order can be filled
Shipped	The order is in the tote and on its way

Use Omniview
for ordering, returns,
destruction or discharge.

E-refills at Point-of-Care Enhance Efficiency

A computer with access to the Internet and an inexpensive handheld scanner allow refills to be entered at the point of care, without entering data by hand. Scanners capture accurate prescription information, then you review and approve the request, and the order is sent automatically to the pharmacy's workflow.

Pre-Admission Assessment Helps You Understand True Costs

Medication screening before admission helps you anticipate pharmacy costs for incoming residents. Input a new resident's medications, and Omniview clearly indicates how much your real pharmacy costs for that resident will be. You can calculate daily supplies and reconcile costs with projected reimbursement.

Event Documentation and Reports Simplify Processes and Increase Accountability

In addition to communicating orders and providing anytime order status, Omniview documents other important pharmacy events, including returns and destructions, and provides proof of delivery for your facility's medications. Omniview also captures resident events, such as leaves of absence and discharge, that have a direct impact on pharmacy delivery and billing. All of the data for your facility's file can be assembled easily into valuable reports, such as resident pharmacy profiles that show at-a-glance the current medication list of any resident served by your Omnicare Pharmacy.

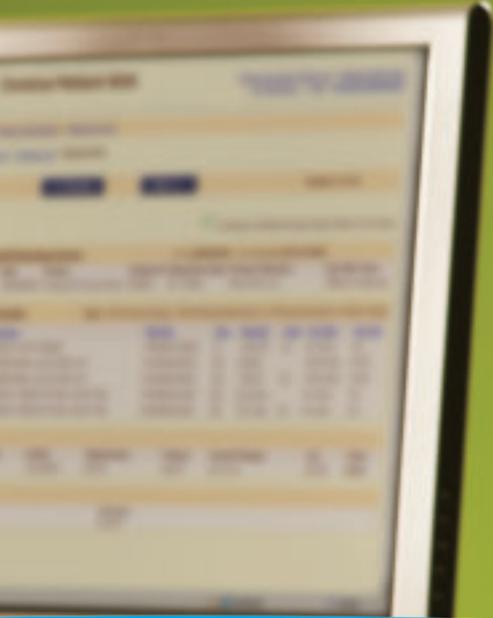

Streamline Billing Processes

Reviewing, analyzing and coding your pharmacy bill can be a complex and time-consuming process. Omniview simplifies this procedure by putting billing information at your fingertips.

- Online access and payment
- Automatic assignment of G/L codes
- Adjudicated price validation function
- Simplified dispute resolution
- Electronic submission of daily census information
- Cost and trend analysis

Shrink Your Invoice Stack with Simplified Dispute Resolution

With easy online access to any transaction on your bill, you can validate prices, dispute charges using an automated system, and capture all transactions within your own billing system. Current disputes and related communication are all clearly highlighted, making it easy to track and manage. Omniview helps both you and your pharmacy resolve things quickly.

Omniview
puts billing
information at
YOUR fingertips.

Automatic G/L and Revenue Codes Save Time and Expense

You can set Omniview to automatically assign your own General Ledger and Revenue codes to pharmacy transactions. This frees both care staff and accounting staff from identifying and cross-referencing drugs and then calculating totals manually. Upload your Accounts Receivable and Accounts Payable transactions as soon as your bill is posted on Omniview, and you have a complete, accurate, and up-to-date view of your pharmacy transactions.

Electronic Daily Census Reduces Billing Discrepancies

Omniview's simple, practical online interface makes it easy for facility staff — you input your resident census and payer information daily into your system and Omniview's automated data feed gives the pharmacy's billing department accurate, up-to-the-minute information. Accurate census and medication data means no backtracking for misplaced data or time-consuming data entry from handwritten records. By streamlining and automating, Omniview enables your pharmacy to act immediately on payer changes. Payers are billed accurately, and your final bill has fewer discrepancies, saving you time and money.

Reports That Optimize Outcomes & Cost Effectiveness

Omniview Provides a Powerful, Real-Time Management Dashboard

Financial reporting in Omniview gives you important perspectives on pharmacy costs. Many reports highlight trends and can even project mid-year estimates and reconcile data from different budget periods. Reports offer strategic global and long-range views into your finances, and provide windows into utilization details and patient transactions. Larger organizations with multiple locations will benefit from Omniview's ability to show data for the entire organization or for particular units.

Aggregated Reports Take the Guesswork out of Decision Making

Omniview's aggregated clinical and financial management reports show you the impact of your cost-saving measures over time. Omniview stores and calculates important measures on up to 15 months of rolling financial and clinical data. You can view pharmacy data in aggregate, by region, or by facility, and you can have your entire chain's aggregated data broken out by facility and delivered securely through Omniview. Each new report is current, with the latest data, totals, and trends.

Critical Information Is Always Available with Easy Access to Consultant Pharmacist Reports

Your current Consultant Pharmacist report—and all previous reports—are always available on Omniview. View online or print as needed.

- Interim Medication Regimen Reviews
- Monthly Drug Regimen Reviews
- Monthly Visit Summaries
- Trend Reports

Track and trend
pharmacy costs for
up to 15 months.

Control Drug Spending with Utilization Reports

Prescription medications are one of your biggest costs, but Omniview helps you control those costs with detailed utilization reports that highlight several key measures:

- **Amount Spent**

See clearly where the bulk of your pharmacy budget goes

- **Number of Transactions**

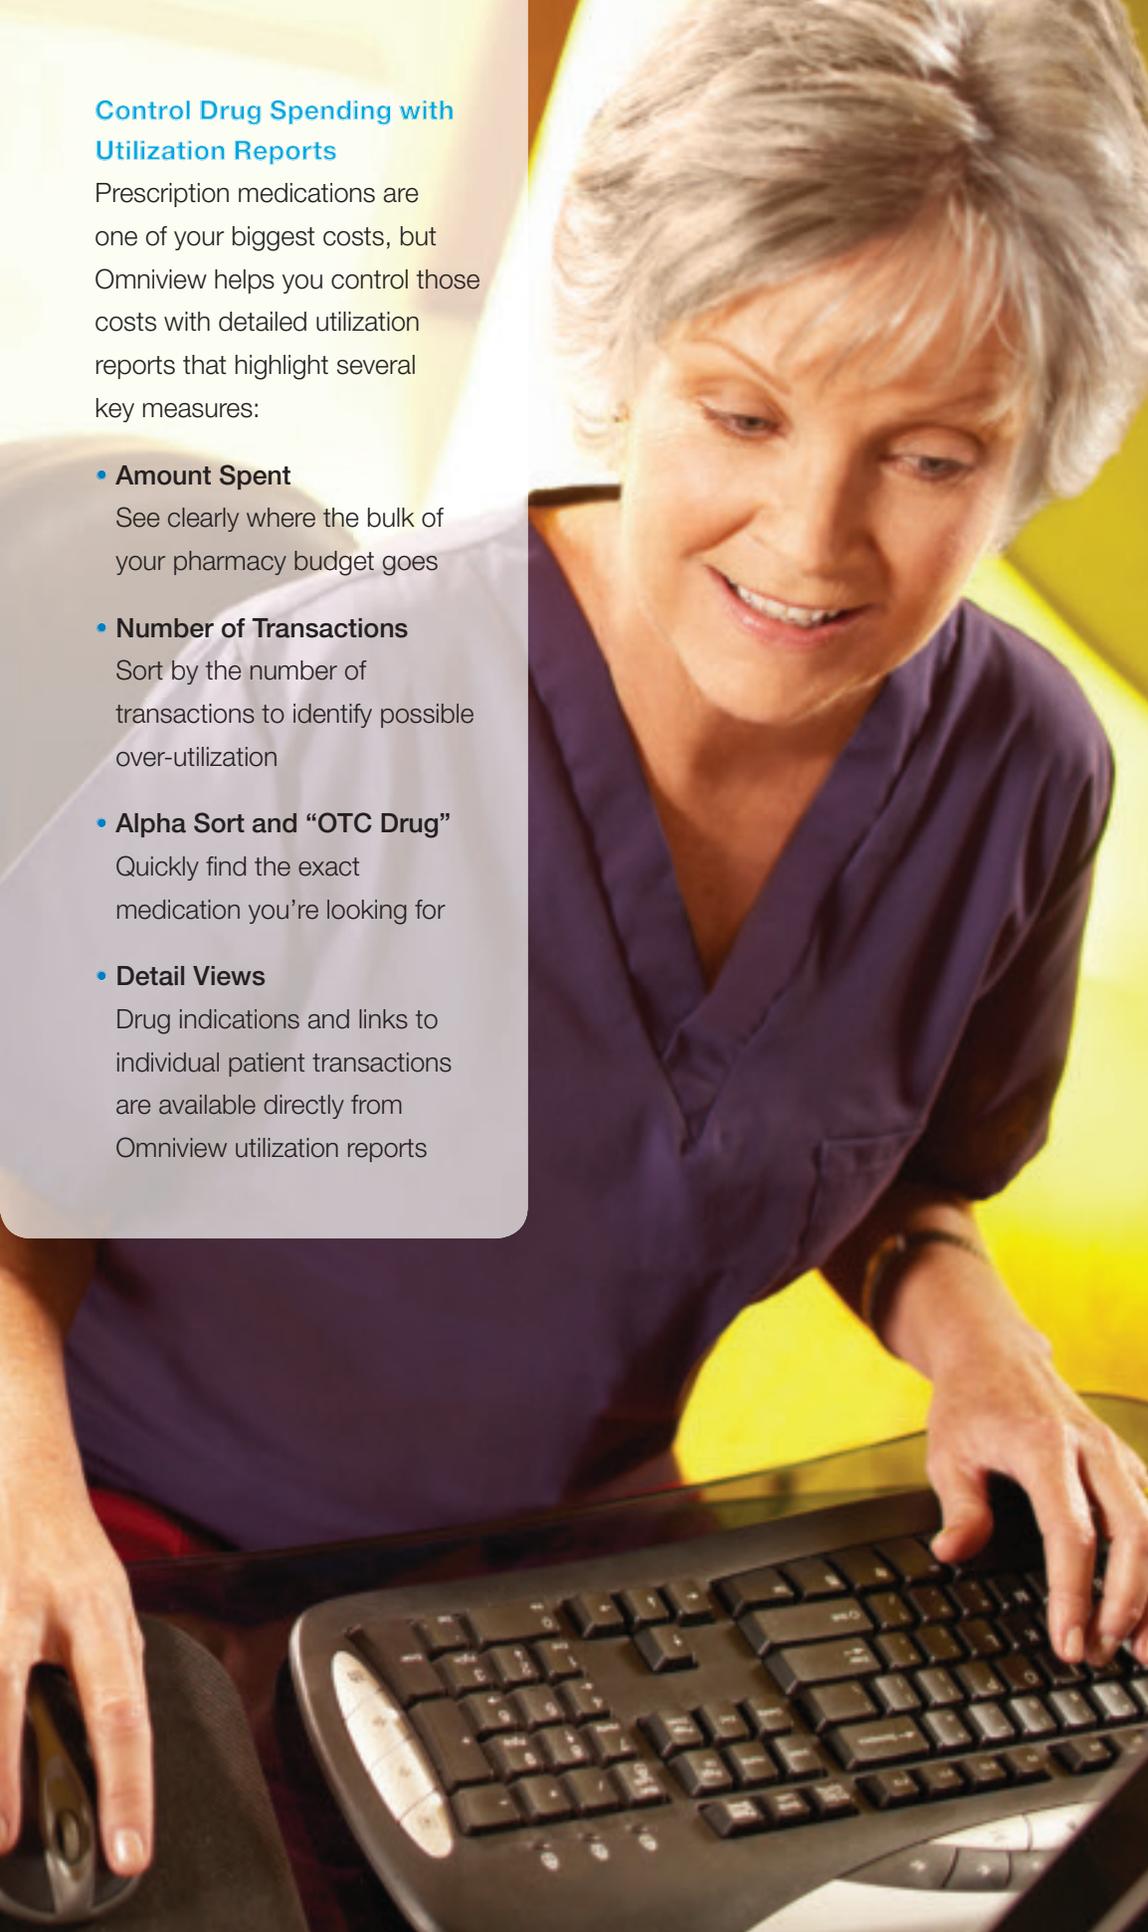

Sort by the number of transactions to identify possible over-utilization

- **Alpha Sort and “OTC Drug”**

Quickly find the exact medication you’re looking for

- **Detail Views**

Drug indications and links to individual patient transactions are available directly from Omniview utilization reports

Increase Safety and Compliance

Easy Access to Current Pharmacy and Health References

Omniview provides the latest editions of a wide variety of references. Whether it's questions about dosing and interactions, safety issues, or procedures with unfamiliar drugs, staff have answers at their fingertips with Omniview's reference library.

- Clinical Pharmacy Services
- Drug Information
- Medicare Part D Resources
- Monthly Newsletters
- Pandemic Flu Customer Resource Center
- IV Infusion Policy & Pharmacy Procedure Manuals
- Medication Safety (Boxed Warnings)
- Material Safety Data Sheets
- Facility Formulary Library
- Drug Recalls & Notices
- State Operations Manual Information

MyOmniview Provides Online Access for Assisted Living Residents

The come-and-go lifestyle of many Assisted Living residents requires an innovative approach to ensure adherence to medication schedules and restrictions.

MyOmniview makes it easy to print clear drug information sheets as needed.

Residents and their responsible parties have easy access to detailed information on all medications any resident is currently using, which is helpful during transfers to hospitals when accurate, complete information is needed quickly. Plus, users can review and pay bills and access many drug and healthcare resources.

Implementing Omniview Is Fast and Simple

With your Omnicare Pharmacy contract in place, Omniview is automatically available to you at no additional charge using a HIPAA-secure Internet connection. Care staff are free to input data wherever and whenever it's convenient, and security features shield sensitive information. Using our training programs, it takes little time for staff to become comfortable with Omniview.

Put Omniview to Work for You

Omniview is available to Omnicare Pharmacy customers as part of our standard pharmacy offering. Call 888-545-OMNI today to learn how Omniview can help you improve outcomes, increase reimbursement, and reduce costs at your facility.
