# Connex® Electronic Vitals Documentation For Long-Term Care

Connex<sup>®</sup> with Electronic Vitals Documentation automates your processes to help reduce errors and enhance clinical decision making.

Manual vitals documentation in skilled nursing facilities is prone to errors and missing information. Even when vitals are entered correctly, there's a delay between the time they're captured and when they're actually posted into the EMR. This can make staff less efficient—and force clinicians to delay decisions or make them without the latest information.

## Connex<sup>®</sup> Vital Signs Monitors

The Connex monitors provide wireless transmission of resident vital signs from the point of care, directly into the medical chart in your EMR. Coupled with wireless import of resident lists from your EMR, the solution is designed to dramatically reduce common transcription errors and streamline the documentation process. Plus, the increased speed helps clinicians to quickly recognize changes in health and improves overall communication.

And the best part of all, the Connex Monitors easily integrate into your existing department workflow, so staff won't have to learn new procedures.

Quick and easy: Automating vitals documentation allows clinicians to identify themselves and the resident, then capture and wirelessly transmit the readings to the EMR—eliminating extra steps and ensuring that vital signs are accurately documented.

Welch Allyn Connex® Software uses industry-standard HL7®. It is the backbone that automates the vitals documentation process to help eliminate manual steps and the errors that go with them.

### Connex Software:

- Is an end-to-end solution that provides immediate access to accurate vital signs data
- Interfaces to your existing EMR using industry-standard HL7
- Provides flexible HL7 and ADT interfaces for resident demographics
- Offers a wide range of workflows, so you can customize it to the way your staff works
- Streamlines workflow, so clinicians can spend more time with residents

Welch Allyn Connex Software is a smart choice today and into the future. It can improve your vital signs capture process right now. And if you already use an EMR, Connex integrates into your existing system.

## Partners in Care<sup>SM</sup> Services

Your clinicians expect their devices to work flawlessly when and where they need them. Your maintenance and IT staff expect support from a true partner who will help fix problems as quickly as possible.

Our suite of Partners in Care Services help keep your Welch Allyn devices and systems working safely and reliably—ultimately protecting your organization's investment, and giving clinicians what they need to care for residents.

- **Support Services**—to help minimize the cost and complexity of servicing and maintaining equipment to factory standards
- **Remote Diagnostics**—the Welch Allyn Service Tool can help keep devices up and running through remote software upgrades as well as troubleshooting and operational support
- **Clinician Training**—promotes clinical best practices to enhance resident care
- **Professional Services**—help effectively integrate new technology into your environment

Talk with your Welch Allyn representative about customizing a plan specifically for your facility.
