Feature	Description
Data Search Screens: Better visibility of search type	An underline is now present of the search screens in order to enhance the visibility for the user to understand the type of search they are currently in. CLAIMS, REMITTANCE, ELIGIBILITY, or CLAIM STATUS SEARCH. (Image attached below)

Feature	Description
Claims List: The Claims List Page presents files that have Errored	<p>The Claims List Page will now present files which have been processed by the engine that have rejected for certain errors. These errors in the past have not been available and the support team has contacted the clients directly to address issues. This new feature allows the user to hover over the name of the file and receive a popup message of the issue as to why the file has failed. Although there may still be reasons that support may contact a client directly, the issues that can be reviewed with this new feature include files that have errored for the following reasons:</p> <ul style="list-style-type: none"> - Invalid Receiver ID: Invalid ReceiverID - Invalid Control Version Number: Invalid Control Version Number - Invalid Sender ID: Invalid SenderID - Submitter Information Missing: Submitter Information missing - Invalid claim file – Missing Claim Information: Invalid claim file - Missing claim info <p>These files will also be represented by a red flag in the Status column along with the status of Error.</p> <p>(Image attached below)</p>
Claims List: The Claims List Page provides different status flags based on the information regarding the file	<p>New visual cues have been added to the Claims List page. Previously the only color flag that appeared on the Claims List page was green which represented that the claims within the file had been responded to. The system now has 3 colors of flags that represent a different status for the file.</p> <p>No Flag. No change. If no flag is present, the system is still waiting to receive responses on 100% of the claims within the file.</p> <p>Green Flag. This represents that 100% of the claims within the file have been responded to and none of the claims have errors or rejections.</p> <p>Yellow Flag. This represents that 100% of the claims within the file have been responded to and one or more of the claims have errors or rejections.</p> <p>Red Flag. This represents that the file has errored and that none of the claims within the file have been processed.</p> <p>(Image attached below)</p>
