Optimum Series

Accounting
Financials
Clinical Software
Electronic Medical Record

Innovative Healthcare Software

Founded in 1977 to develop Clinical and Financial software for SNFs, CCRCs, Nursing Home Chains, State Veterans Homes and Adult Daycare Centers that automates the many business processes involved with long-term resident care.

Accounting & Billing Solutions

- Fully integrated Census, EMR and Financial applications
- Powerful accounting modules
- Integrated reporting tools that calculate Per-Patient Per-Day summary totals

Electronic Medical Record

- Capture higher reimbursements
- Manage Single/Multi-site facilities
- Maximize RUG scores
- Single database for all modules
- Real-time quality indicators of quality care

ADT Software

- Capture basic identification data
- Keep daily census current
- Monitor financial/census statistics
- Record detailed demographic info

Full Range of Applications

- Executive decision-support
- Comprehensive software suite
- Information management tools
- Fully scalable modular design
- Software as a service solutions
- Support team all industry professionals
- Systems designed to improve quality of care, productivity and financial performance
