Fast Reports
SQL Reporting Services

Integrated Census Control

Easily manage invoice adjustments with an integrated ADT census that automatically updates billing records and provides detailed summaries that can be used to verify that all resident days are included in an invoice.

Managing Multiple Payors

Review and correct bills before committing them to history and then bill all payors at one time without having to process separate runs for each invoice type.

Medicaid & Medicare Billing

Complies with all State Medicaid billing requirements, including rules for bed retentions (BR) and leaves of absence (LOA). Also, provides alerts when a resident approaches the LOA and Bed Retention benefit limits.

Coordination of Benefits

Manage deductibles and co-insurance, then automatically invoice secondary third party payors for services not covered by a resident's primary insurers.
