The screenshot shows the 'MDS Schedule - ADLU' window. It features a toolbar with various icons and a table of resident data. The table has columns for 'First', 'Last', 'Admit Date', 'Room', 'Sign Date', 'CAR Date', and 'CP Date'. The data rows show residents like ALLEN, GEORGE; SMITH, CAROL; GRAHM, WINSTON; MARSHALL, GERRY; SMITH, SUEANN; SMITH, SAMUEL; PRETTY, GIRL; FITZPATRICK, BOBBY; and FARWELL, SANDRA. A status bar at the bottom indicates '0% Recalculating schedule... done (0:0.47)'. On the right side, there are buttons for 'Delete', 'Save', 'Cancel', 'MDS', 'Edit', and 'Export', along with a 'Colors' legend.

MDS Scheduling

Be more productive, stop counting Medicare admission days to determine the MDS schedule. Let the MDS Scheduler auto-calculate the next assessment directly from the date of admission and the last MDS submission.

ARD Optimizer

The Scheduler uses rehab minutes, both actual and projected, to assist you in determining the best date to select for your ARD in order to maximize the resident RUGS scores.

Medicare Scheduling

Accurately calculate PPS 5-14-30- 60-and 90 Day Assessment schedules. Optimal Grace Days can be assigned.

OFF Cycle MDS Assessments

Schedule MDS OMRA and Significant Change Assessments. The last covered Medicare day is highlighted in the Scheduler.
