HIPAA Security
MDS / ARD Scheduler Optimizers
MDS / Care Planning / OE

HL7 Rehab Interfaces
Casamba
Optima Rehab
HealthPro

Report Writers
ADL Reportwriter
Crystal Reports
Fast Reports
SQL Reporting Services

Real-time Rehab Charting
Easily captures treatments and minutes at the Point-of-Care (POC) using wall-mounted touchscreens, tablet PCs, and hand-held devices to reduce paperwork and minimize transcription errors. Chart direct/indirect minutes and results in real-time as services are performed, at the touch of a button.

Integration with Billing
Treatment minutes and units are automatically passed to Billing. The system assigns the billable paysource, and applies appropriate charges on Medicare Part A/B, private, and insurance bills.

Part B Therapy Cap Exceptions
Automatically handle Part B Therapy Cap Extensions using the KX Modifier. The CCI edits (Code 59) may be set to automatically display when required and then allow the therapist to apply or not.

Accurate, Historical Information
The data in every session is maintained for reporting and statistical analysis. HIPAA security is maintained through electronic signatures and unique PIN numbers.
