

# Electronic Bed Board

“Graph Census Map by Room”

## Benefits

- Decrease Vacancies
- Improve Communications
- Increase Capacity
- Proactive Planning
- Raise Productivity
- Real Time Tracking

## Features

- Alert Tags
- Digital Occupancy Display
- Monitor Transfers
- Multiple Monitors
- Room / Bed Management

## Integrated With

- ADT/Census
- Room/Bed Control

## Placement

- Admissions Office
- Housekeeping
- Kitchen

## Available Tagging

- Bed Retention
- Clean
- Close To
- Decertification
- Discharge
- Enteral
- Hospice
- Oxygen
- Paint
- Quarantine
- Refurbish
- Reserved
- Swing
- Vent

## Report Writers

- ADL Reportwriter
- Crystal Reports
- Fast Reports
- SQL Reporting Services

## Goodbye, Whiteboards

Replacing traditional whiteboards and tags with large TV display screens. Room and patient status is displayed with color coded status indicators and alert flags. View and modify facility occupancy on a wide TV screen that can have the same technology which in the past was affordable only by hospitals.

## Graphical Room View

A color coded map of rooms and occupants display on a large wide screen TV. Determine room status at a glance. Colors indicate the gender and/or the status of the Room-Bed. If the system is connected via interface the display updates in real-time as changes are made to the patient / resident census.

## Settable Status Tags & Icons

Settable tags display letter codes and colorful icons can be turned on or off to indicate the Status and Services required for the room-bed. For example, a room can be tagged as Quarantined or Decertified.

## Manage Admissions

Identify vacancies and expected discharges quickly to identify available accommodations for incoming patients. Provides an easy tracking of room-bed availability.

## Room Maintenance

Set Status Tags to alert maintenance and housekeeping of servicing needed. Improve communications by displaying the housekeeping status of the Rooms and Beds.

## Multiple Monitor Support

The application can handle multiple display monitors located throughout the facility. Nursing units can be displayed independently on designated screens allowing small nursing units to visualize their rooms and beds specifically for their units.
