Dx Notes:

ADL's Accident Incident Report captures the required data needed to complete the documentation and notifications for accidents and incidents that have occurred in the facility.

Data Capture

- Specify mandatory data fields to ensure capturing exactly the data you need to properly document and report for incidents and accidents.
- Record the type of fall, location, date and time, shift and unity, witness, who reported the fall, whether the resident was hospitalized.
- Leave detailed comments and setup user-defined fields that will customize the data collected.

Analysis and Reporting

- Produce easy to read statistics and reports
- Enhance risk management by providing information to develop and promote effective policies and programs.
- Produce reports that analyze the database and suggest possible contributing causes or practices
- Use reports to determine changes in policy or procedures that may reduce the frequency of the problems.
